Mirc PezzottoQ: jq json array In the following json array: [ { "id": "2", "name": "Bill" }, { "id": "1", "name": "Gordy" } ] How can I only select only the name's of the first id? A: You can use.select() to change only the values of an object, and specify a key to use to select one or more values: .select('name', 'id') Demo Note:.select() changes the input, but then you have to use.first() to get the first element (as you are selecting only one key from the input). If you are only selecting a single key, you don't need.select(), you can use.first() instead. .first() If no keys are provided, the first element matching criteria is returned; otherwise, nil is returned. .select(keys) If keys is provided, it is used as the set of possible keys to select from the object, and any property names not found in this set are ignored. If no keys are provided, the values of object are used as the set of possible keys. I've included the whole thing in one line for convenience, as I don't know how the original JSON data is constructed. .first() If no keys are provided, the first element matching criteria is returned; otherwise, nil is returned. One of Britain's most well-known cheese makers has made a U-turn on plans to move production out of the UK. After a public outcry, Plaice cheese maker Plaice Cheese Company has decided to stick to its original plan to make cheese in Scotland. The firm's owner, Charles Murray, who was speaking ahead of an awards ceremony in London, said: "There's a lot of pressure on us." Cheese makers in the UK make cheese using moulded bacteria, but an EU law known as Regulation 1257/1258 forbids the practice on safety grounds. The cheese industry in Scotland wants the

Girl, 17, shot in hip during road rage incident Nash County Sheriff's Department Published 12:11 am, Saturday, January 30, 2013  
JAKE ROGERS Staff Writer A 17-year-old from Bismarck was charged with assault and battery, according to a sheriff's report. Jake Rogers, 17, was at his house on Ytje Station Road around 1 p.m. Thursday when he was approached by a man outside his home, the report states. The man accused Rogers of stealing property from him. Rogers denied the accusation and began to leave. The man took offense and followed Rogers as he was backing his truck into the road, according to the report. The report states that Rogers was walking away when the man fired multiple shots at Rogers, striking him in the hip. The shots were fired from less than a foot away and no one else was in the vicinity, according to the report. Rogers was taken to North Dakota Methodist Hospital by ambulance. He was treated and released the same day. The man was identified as Duanne O'Donel Johnson. Johnson said in the report that he saw Rogers at his house and asked him to return some property, which he did. Rogers said he would go get it, but Johnson never saw him leave. Johnson told police that he shot at Rogers from his truck and fired four shots, the report states. He said he saw Rogers fall and he stopped firing because he was afraid that he would hit him. Rogers said that Johnson came up to him, grabbed him by the shirt and told him, "You're going to die right here, Jake." Rogers told police that he did not know Johnson and that he had never seen him before. He said he never saw Johnson with a gun. Johnson was cited for assault, disorderly conduct and interfering
